Editorial

The Lead articles correlates psychological performance with Emotional intelligence and cognitive flexibility for combat and non-combat games. While cognitive flexibility was found to be significantly correlated with psychological performance for both types of games; Emotional Intelligence only had a positive but not statistically significant relationship with the latter. Interestingly's Emotional Intelligence had a significant positive correlation with cognitive flexibility for the non-combat group.

The second article is a study performed on soccer players under regulated and non self regulated conditions while performing specific skills in soccer.

The third article is with a reference to study conducted in athletes of hammer throw event during competitive preparation. The study shows that the selected basic and specific tests are highly related to hammer throw performance.

The last article presents a study on Somatotype of male wrestlers. They have concluded that somatotype of male wrestlers in all categories combined as endomorphic

mesomorph. The study is in comparison to Indian data reported by Dr. Sodhi and Dr. Sidhu in 1984.

We hope you find these articles interesting and useful.

Dr. S.S. Roy
